FOR IMMEDIATE RELEASE

January 25, 2005

## **MOVINCOOL INTRODUCES THE NEW OFFICE PRO 36 PORTABLE SPOT COOLER**

**LONG BEACH, CA. (January 25, 2005)** - MovinCool, the market leader in portable spot cooling, today announces the addition of the new Office Pro 36 to its complete line of portable spot cooling solutions. The OP36 is the latest key player to join MovinCool's award-winning, ETL performance-verified lineup of workplace air conditioning products.

The Office Pro 36 delivers 36,000 Btu/H of cooling, making it ideal for offices, schools, healthcare and other facilities with servers, routers, telecom or other heat-sensitive equipment and workspaces up to 2,400 square feet.

Special features on the new OP36 include low temperature operation, which provides a safe, cool environment for heat-sensitive equipment; a standard AFCI plug, a safety feature that protects against electrical arcing; and easy-to-use programmable controls for automatic operation after hours and on weekends. In addition, an optional "Plug N' Play" pump can be installed in minutes, eliminating the need to manually drain the condensation tank. Continuous running and draining make after-hours operation simple and efficient.

"Permanent or temporary spot cooling is essential for many small to medium businesses with critical equipment and workspaces, according to John Doran, manager, Heat Management Department. "MovinCool pioneered the concept of workspace spot cooling," Doran added, "and offers units from those that can cool one person in one office to those that can cool up to 4,000 square feet of space."

"The OP36 fills an important niche in our Office Pro lineup of products," Doran said. "It fits in near the upper end of the Office Pro line and meets the needs of larger facilities

- more -

with all the convenience and portability of our smaller units," Doran noted.

Heating office buildings, schools, telecommunications or healthcare facilities during the winter can create unique problems. The heat generated by the critical equipment in these locations can cause added heat build-up in the immediate area and potentially damage the equipment or adversely affect its performance. During the summertime, heat build-up in equipment rooms and the “dead areas” that the central air conditioning cannot reach demands the quick fix of a versatile, portable spot cooler.

The OP 36 can come in to handle these problem areas and can move around from place to place as the need warrants because you simply roll it in, plug it in, and turn it on to get instant spot cooling in any critical area. The OP 36, just as the rest of the MovinCool lineup, is totally self-contained, plugs into a 230V outlet, and can be brought in and put to work in minutes.

For companies with smaller or larger spaces to cool, MovinCool’s Office Pro lineup is a seamless series of spot cooling solutions that will fit most requirements. MovinCool portable spot cooling solutions offer more units, more power, more protection, more affordability and higher cooling capacities than most comparable portable air conditioners up to 60,000 BTU/h.

Companies looking for additional information and advice on portable spot cooling and the MovinCool lineup of air conditioning units can visit the MovinCool website at [www.movincool.com](http://www.movincool.com) or contact the company directly at 800-264-9573.

MovinCool is a brand of DENSO, one of the world's largest manufacturers of automotive parts, robotics and spot coolers. The company pioneered the idea of portable cooling systems to meet its own automotive factory needs in Japan. Since then, MovinCool has designed a range of models designed to address the needs of offices and computer rooms. MovinCool is located at 3900 Via Oro Avenue in Long Beach, California, 800-264-9573.
