New MovinCool Office Pro 10 Keeps Your Small Office/Home Office Cool

LONG BEACH, Calif. – No one performs well under extreme heat. Stuffy warehouses and offices can lead to heat exhaustion and low productivity for employees. MovinCool, the market leader in portable air conditioning, today announced the availability of the new Office Pro 10. With the highest performance available in a compact design, the Office Pro 10 is ideally suited for small retail, office or warehouse spaces that are not cooled by a central air conditioning system.

The stylish Office Pro 10 makes air conditioning solutions possible virtually anywhere and installation a breeze through its compact, portable design. The unit is fully self-contained with no costly installation necessary so it can simply be wheeled in, plugged into a standard 110V socket and switched on, instantly providing up to 10,000 BTU/h. The Office Pro 10, which is about half the size of a two-drawer filing cabinet, also offers a revolutionary, balanced air flow system for the most efficient cooling possible.

The Office Pro 10 is perfectly suitable for a one-person office and other small spaces such as offices in older buildings, warehouse spaces and retail establishments that do not have central air conditioning or windows. In some cases, such as historical buildings, laws are established to protect a building's aesthetics, architectural integrity, or safety and do not allow window air conditioners to be installed. In addition, the Office Pro 10 offers quietness and better security since it does not require the office windows to be kept open.

- more -

“The new Office Pro 10 is an ideal solution to an age-old problem,” said John Doran, Manager of the MovinCool Department. “It provides an easy way to keep your personal work space cool, or if you have employees, it keeps your business running smoothly and prevents drops in productivity. It is an inexpensive way to get air conditioning quickly when you are working in a small space and don’t have the luxury of central air conditioning or windows.”

High humidity, often accompanied by high heat, can similarly affect employee comfort and productivity. The Office Pro 10 dehumidifies as it cools. Dehumidifiers simply remove humidity, but do not cool the office space.

Quality is a top priority for MovinCool. Recently, Intertek Testing Services, a company utilized by OSHA and the Air Conditioning and Refrigeration Institute (ARI), certified that most MovinCool models outperform their nearest competitor in terms of cooling capacity (Btu/h), energy efficiency (EER), and airflow (CFM). Assuring quality performance and customer satisfaction, MovinCool is the only portable cooling system in the industry to be verified by the Electrical Testing Laboratories (ETL). MovinCool portable spot cooling solutions offer more units, more power, more protection and more affordability.

Other benefits of the Office Pro 10 include fully automated operation with digital controls, 24/7 programmability and a full function remote for greater convenience and control. An optional kit is available allowing the exhaust air to travel through a duct and exit out of the room through a ceiling panel or other small opening for optimum cooling.

Companies looking for information on back-up cooling can visit the MovinCool web site at www.movincool.com or contact the company directly at 800-264-9573. MovinCool units provide higher cooling capacities than most portable air conditioners, generating up to 60,000 BTU/h. The MovinCool web site offers details about which units are compatible with various back-up generators and specifies voltage requirements.

MovinCool is a brand of DENSO, one of the world's largest manufacturers of automotive parts, robotics and spot coolers. The company pioneered the idea of portable cooling systems to meet its own automotive factory needs in Japan. Since then, MovinCool has designed a range of models designed to address the needs of offices and computer rooms. MovinCool is located at 3900 Via Oro Avenue in Long Beach, California, 800-264-9573. For more information, visit www.movincool.com.

Established in 1971 as the first overseas affiliate of the DENSO Corporation, DENSO Sales California, Inc., is an automotive parts sales and distribution company that employs 252 people in Long Beach, Calif. Sales for the fiscal year ended March 31, 2003, totaled US\$563 million. The company's product lines include original equipment, aftermarket and re-manufactured automotive parts, heavy-duty diesel and electrical components, portable commercial air-conditioning units, panel coolers and industrial robots.

DENSO Corporation, headquartered in Kariya, Aichi prefecture, Japan, is a leading global supplier of advanced technology, systems and components. Worldwide, the company employs 90,000 people in 31 countries and regions, including Japan. Consolidated global sales for the fiscal year ended March 31, 2003 totaled US\$19.4 billion. In the Americas (North, Central and South America), DENSO employs 14,000 with consolidated sales for the above fiscal year totaling US\$4.5 billion.

DENSO common stock is traded on the Tokyo, Osaka and Nagoya stock exchanges. For more information, go to www.densocorp-na.com.
