MovinCool Introduces Office Pro 18 Delivering the Highest Cooling Capacity Possible From a Standard 115 Volt Power Source

MovinCool is the only portable cooling system in the industry to be certified by the Electrical Testing Laboratories (ETL)

LONG BEACH, Calif. – Hot, severe temperatures can cause heat-sensitive computer servers and other office systems to fail, causing costly downtime and repair of essential computer and telecommunication systems. MovinCool, the market leader in portable air conditioning, today announced the availability of the new Office Pro 18. Delivering the highest cooling capacity possible from a standard 115V power source, the Office Pro 18 can help companies cool their heat-sensitive office systems and protect against the loss of data.

The Office Pro 18 can easily cool a space of up to 750 square feet on its own or up to 1,200 square feet if being used as a supplemental cooling device. The self-contained unit features easy-to-use programmable controls allowing it to operate automatically after-hours or during weekends when heat can cause damage to expensive office equipment. The Office Pro 18 is also ideal for emergency back-up needs.

The Office Pro 18 makes air conditioning solutions possible virtually anywhere and installation a breeze through its self-contained, portable design. The unit is fully self-contained with no costly installation necessary so it can simply be wheeled in, plugged

into a standard 115V power source and switched on, instantly providing up to 16,800 BTU/h.

During the research and development process for Office Pro 18, MovinCool discovered that many portable air conditioners fall short of the cooling capacity claimed on the packaging. The Office Pro 18 is the only portable cooling system in the industry to be verified by the Electrical Testing Laboratories (ETL), utilized by OSHA and the Air Conditioning and Refrigeration Institute (ARI) as a Nationally Recognized Testing Laboratory. In fact, last years test results showed that most MovinCool models outperformed its nearest competitor in terms of cooling capacity (Btu/h), energy efficiency (EER), and airflow (CFM) assuring quality performance and customer satisfaction.

“High heat can be a year-round problem for IT equipment in any climate, not just during hot summer months,” said John Doran, Manager of the MovinCool Department. “Many central air conditioning systems cannot keep valuable computer equipment and server rooms cool enough. MovinCool’s Office Pro 18 is an important tool to protect against equipment failure, loss of data, and costly shut down time.”

Companies looking for information on back-up cooling can visit the MovinCool web site at www.movincool.com or contact the company directly at 800-264-9573. MovinCool portable spot cooling solutions offer more units, more power, more protection and more affordability. MovinCool units provide higher cooling capacities than most portable air conditioners, generating up to 60,000 BTU/h. The MovinCool web site offers details about which units are compatible with various back-up generators and specifies voltage requirements.

MovinCool is a brand of DENSO, one of the world’s largest manufacturers of automotive parts, robotics and spot coolers. The company pioneered the idea of portable cooling systems to meet its own automotive factory needs in Japan. Since then, MovinCool has designed a range of models designed to address the needs of offices and computer rooms. MovinCool is located at 3900 Via Oro Avenue in Long Beach, California, 800-264-9573. For more information, visit www.movincool.com.

Established in 1971 as the first overseas affiliate of the DENSO Corporation, DENSO Sales California, Inc., is an automotive components sales and distribution company that employs 252 people in Long Beach, Calif. Sales for the fiscal year ended March 31, 2003, totaled US\$563 million. The company's product lines include original equipment, aftermarket and re-manufactured automotive parts, heavy-duty diesel and electrical components, portable commercial air-conditioning units, panel coolers and industrial robots.

DENSO Corporation, headquartered in Kariya, Aichi prefecture, Japan is a leading global supplier of advanced technology, systems and components. Worldwide, the company employs 90,000 people in 31 countries and regions, including Japan. Consolidated global sales for the fiscal year ended March 31, 2003 totaled US\$19.4 billion (2,332.8 billion yen or 17.9 billion euros). In the Americas (North, Central and South America), DENSO employs 14,000 people with consolidated sales for the above fiscal year totaling US\$4.5 billion.

DENSO common stock is traded on the Tokyo, Osaka and Nagoya stock exchanges. For more information, go to www.densocorp-na.com.
